VERNON B. ROMNEY  
ATTORNEY GENERAL

ROBERT B. HANSEN  
DEPUTY

September 14, 1970

Mr. Jack Wimmer  
Nine Mile  
via Price, Utah 84501

Dear Mr. Wimmer:

RE: Nine Mile Distribution System

The State Engineer has advised the Attorney General that you have been diverting water from Argyle Creek without a proper water right. Other users on the system have complained to the State Engineer that they are being deprived of water by your actions. This has resulted in the water commissioner having to make a number of unscheduled trips into this area causing an additional distribution expense to all the other water users from this source. This situation cannot be allowed to continue, therefore, we are requesting that you conform to the water distribution schedule being administered by the State Engineer and cease diverting water except when authorized by the commissioner in order that we may avoid pursuing this matter any further.

If you have any questions concerning this matter, please contact me at once.

Very truly yours,

Dallin W. Jensen  
ASSISTANT ATTORNEY GENERAL

DWJ/cp

cc: Hubert C. Lambert, State Engineer ✓
